

"The best way to predict the future is to invent it"
Alan Kay

Company profile

PubScan is a consultancy company specialized in assisting Life Sciences oriented companies in innovation and the identification of new business opportunities. We aim to help our clients to innovate their business, by providing them with comprehensible solutions to their questions. Our services are based on in depth knowledge of the Life Sciences combined with insights in the business side of the Life Sciences industry. Our customers include Life Sciences companies; technology transfers offices; universities and NGO's. Please visit our website for a complete overview of our portfolio.

Our services include:

- Literature searches, e.g. meta-analysis of publications on the topic of available biomarkers for the diagnosis of frontotemporal dementia.
- Sector analysis, e.g. mapping and classification of the Life Sciences industry of various geographical locations; finding partners.
- Market surveys and competitors analysis, e.g. creating an inventory of the currently available MAO-B inhibitors.
- Literature services, e.g. providing content or translations for magazines and websites of NGO's and patient organizations.

Vision

PubScan has been a reliable partner when it comes to scientific information. To be able to offer our clients a complete set of services we are now working to become patent information specialists. In the near future we will be expanding our services with prior-art searches and freedom-to-operate searches. In this way, we strive to provide complete innovation cycle consultancy and project management; from idea to market.
